

KXTF9 Series

Accelerometers and Inclinometers

FEATURES

- Ultra-Small Package - 3x3x0.9mm LGA
- User-selectable G Range
- User-selectable Output Data Rate
- Directional Tap/Double-Tap™* Detection Algorithm
- Active/Inactive Detection Algorithm
- Device-orientation Detection Algorithm
- Digital I²C 8-bit or 12-bit Resolution
- Digital High-Pass Filter Outputs
- Low Power Consumption
- Lead-free Solderability
- Excellent Temperature Performance
- High Shock Survivability
- Factory Programmable Offset and Sensitivity
- Self-test Function

PROPRIETARY TECHNOLOGY

These high-performance silicon micromachined linear accelerometers and inclinometers consist of a sensor element and an ASIC packaged in a 3x3x0.9mm Land Grid Array (LGA). The sensor element is fabricated from single-crystal silicon with proprietary Deep Reactive Ion Etching (DRIE) processes, and is protected from the environment by a hermetically-sealed silicon cap at the wafer level.

The KXTF9's *Directional Tap/Double-Tap™* detection feature recognizes single-tap and double-tap input and reports the acceleration axis and direction from which each tap originated, enabling up to 12, user-defined, function commands. Its active/inactive algorithm reports changes in a device's motion state, either moving (active) or not moving (inactive), and the orientation-detection feature reports changes in landscape, portrait, face-up, and face-down conditions. A highly-manufacturable product with consistent product performance across use conditions, the KXTF9 operates across a supply voltage of 1.8V to 3.6V DC.

The sensor element functions on the principle of differential capacitance. Acceleration causes displacement of a silicon structure resulting in a change in capacitance. The sense element design utilizes common mode cancellation to decrease errors from process variation and environmental stress. An ASIC, using a standard CMOS manufacturing process, detects and transforms capacitance changes into an analog voltage, which is proportional to acceleration. Analog signals are further processed into digital signals and within embedded digital algorithms. The device communicates to the system via I²C bus interface.

MARKETS

APPLICATIONS

Mobile Phones and Mobile Internet Devices

- User Interface
- Gesture Recognition
- Power Management
- Active/Inactive Monitoring

Game Controllers and Computer Peripherals

- Inclination and Tilt Sensing
- User Interface
- Power Management
- Activity Monitoring
- Gesture Recognition

Health Care and Fitness

- Static and Dynamic Acceleration
- Activity Monitoring
- Gesture Recognition

Personal Navigation Devices

- E-Compass
- Dead Reckoning

KXTF9 Series

Accelerometers and Inclinometers

PERFORMANCE SPECIFICATIONS

The performance parameters below are programmed and tested at 1.8 volts. However, the device can be factory programmed to accept supply voltages from 1.8V to 3.6V. Performance parameters will change with supply voltage variations.

PERFORMANCE SPECIFICATIONS			
PARAMETERS	UNITS	KXTF9-4100	CONDITION
Range	g	±2.0, ±4.0, ±8.0	User-selectable full-scale output range
Sensitivity ¹	counts/g	64, 32, 16 typical	(8-bit)
		1024, 512, 256 typical	(12-bit)
Sensitivity vs. Temp	%/°C	±0.01 (xy) ±0.03 (z) typical	
0g Offset vs. Temp.	mg/°C	±0.7 (xy) ±0.4 (z) typical	
Mechanical Resonance ²	Hz	3500 (xy) 1800 (z) typical	-3dB
Output Data Rate (ODR) ³	Hz	25 min; 800 max	
Bandwidth ⁴	Hz	ORD/2 typical	
Non-Linearity	% of FS	1.0 typical	% of full scale output
Cross-axis Sensitivity	%	2.0 typical	
I ² C Communication Rate	KHz	400 max	
Power Supply	V	1.8 typical	Factory programmable, 1.8V - 3.6V
Current Consumption	µA	230 typical	RES = 0; Operating
	µA	570 typical	RES = 1; Operating
	µA	0.1 typical	Standby
ENVIRONMENTAL SPECIFICATIONS			
PARAMETERS	UNITS	KXTF9-4100	CONDITION
Operating Temperature	°C	-40 to 85	Powered
Storage Temperature	°C	-55 to 150	Un-powered
Mechanical Shock	g	5000, 0.5 msec 10,000, 0.2 msec	Powered or un-powered, halversine
ESD	V	2000	Human body model

¹ Resolution and acceleration ranges are user selectable via I²C.

² Resonance as defined by the dampened mechanical sensor.

³ User selectable.

⁴ Dependent on ODR and 8-bit or 12-bit resolution.

ORDERING GUIDE

Product	Output	Axis(es) of Sensitivity	Range (g)	Sensitivity (counts/g)	Offset (counts)	Operating Voltage (V)	Temperature (°C)	Package
KXTF9-1026	Digital I ² C	XYZ	2, 4, 8	64,32,16 (8-bit) 1024, 512, 256 (12-bit)	0	2.6	-40 to +85	3x3x0.9mm LGA
KXTF9-4100	Digital I ² C	XYZ	2, 4, 8	64,32,16 (8-bit) 1024, 512, 256 (12-bit)	0	1.8	-40 to +85	3x3x0.9mm LGA
